

# InjectaFlo Softener and DeScaler

## An Alternative to Salt Based Water Softeners

There is no longer a need for expensive salt based ion exchange softeners. With the **InjectaFLO Softener and Descaler** you will totally eliminate the use of salt and the wasted water that comes along with backwashing, while providing your home with comfortably soft water. For these reasons, the **InjectaFLO Softener and Descaler** is a more environmentally friendly solution to hard water problems.

With water shortages prevalent, does it make sense to waste up to 200 gallons of water a week with a salt based ion exchange softener? This wasted water is also toxic to landscaping and can cost approximately \$125.00 per year. Along with wasted water, ion exchange softeners require a lot of salt per week or month... those bags are heavy and hard to carry.

With the **InjectaFLO Softener and Descaler** those problems are a thing of the past. There is no longer a need for bagged salt and no water is wasted. Just add the **Liquid** when indicated by the systems blinking red light and you're done.

**Wasted Water**  
( ≈ \$100's of dollars/ yr)  
**Requires Salt or Potassium**  
( ≈ Big \$ spent monthly)

**Compact Size**

**Toxic to landscaping**

**Requires Regeneration**

**Harmful to Environment**

**Green Product**

**100% Non Toxic**

	Salt Based Softeners	Watch Dosing Softener
<b>Wasted Water</b> ( ≈ \$100's of dollars/ yr)	Yes	No
<b>Requires Salt or Potassium</b> ( ≈ Big \$ spent monthly)	Yes	No
<b>Compact Size</b>	No	Yes
<b>Toxic to landscaping</b>	Yes	No
<b>Requires Regeneration</b>	Yes	No
<b>Harmful to Environment</b>	Yes	No
<b>Green Product</b>	No	Yes
<b>100% Non Toxic</b>	No	Yes

Both **Scale Soft** and **Scale Liquidator** liquids are green products that is not harmful to landscaping or the environment and is 100% non toxic. One gallon of **NewFresh Water Systems** liquids treat 23,500 gallons of water.
